

```
1 package mypackage;
2
3 interface Animal111{//java interfaces accepts only abstract methods
4     abstract void sound();
5 }
6 class Horse implements Animal111{
7     @Override
8     public void sound() {
9         System.out.println("woof woof");
10    }
11}
12 class Tiger implements Animal111{
13     @Override
14     public void sound() {
15         System.out.println("roarr roarr");
16    }
17}
18
19
20 public class Interface {
21
22     public static void main(String[] args) {
23         // TODO Auto-generated method stub
24         Horse h=new Horse();
25         h.sound();
26         Tiger t=new Tiger();
27         t.sound();
28
29     }
30
31 }
32
```
