

```

1 package mypackage;
2 class Final{
3     public void final_method1() {
4         System.out.println("Final method 1");
5     }
6 }
7 }
8 class Final1 extends Final{
9     public void final2_method() {
10        System.out.println("Final method 2");
11    }
12 }
13 }
14 public class Final_keyword {
15
16     public static void main(String[] args) {
17         final int a=100; //final variables cannot be updated
18         //a=200;
19         System.out.println("a value:"+a);
20         Final1 f1=new Final1();
21         f1.final_method1();
22         f1.final2_method();
23     }
24
25 }
26

```
