```java
package Static;

public class Main {
static int a=100; //static var
    int b=200; //non static var
    String d="Non static method";
public static void main(String[] args) {
 System.out.println("a value:"+a);

 Main m=new Main();
 System.out.println("b value:"+m.b);
 System.out.println("Static Method");
 System.out.println(m.d);

 }

}
```
