```java
package mypackage;
class Company{ //parent class
 public void company_method(){
 }
}
class Manager extends Company{
 public void company_method(){
  System.out.println("Mngr id:");
  System.out.println("Mngr name:");

 }
}

class Employee extends Company{
 @Override
 public void company_method(){
  System.out.println("Employee id:");
  System.out.println("Employee name:");

 }
}

public class company_poly {

 public static void main(String[] args) {
  Manager m=new Manager();
  m.company_method();
  Employee e=new Employee();
  e.company_method();
 }

}
```
