```java
package mypackage;

abstract class Animal3{       //abstract class

 abstract void sound(); //abstract method

}
class Dog3 extends Animal3{  //child class
 @Override
 void sound() {
  System.out.println("Bow Bow...");
 }
}
class Cat3 extends Animal3{  //child class
 @Override
 void sound() {
  System.out.println("Meow Meow...");
 }
}

public class Abstraction {

 public static void main(String[] args) {
  Dog3 d=new Dog3();
  Cat3 c=new Cat3();
  d.sound();
  c.sound();
 }

}
```
